

One Intelligence Platform for cyber, geopolitical and physical risk

Make intelligence-led decisions to strengthen operational resilience

Modern cyberattacks have evolved into stealthy, unpredictable and persistent adversaries, creating challenges for organisations worldwide. Security teams need to be able to gain visibility into the threat landscape and make informed decisions quickly and accurately to mitigate risk, ahead of impact.

The Silobreaker Intelligence Platform

The Silobreaker intelligence platform helps organisations transform data into actionable intelligence for enhanced risk management. By aligning with all stages of the intelligence cycle, Silobreaker automates data collection, boosts analysis, and streamlines intelligence production, enabling teams to support a wide range of stakeholder priority intelligence requirements (PIRs) in a single platform.

This empowers intelligence teams to identify and monitor threats across cyber, geopolitical and physical risks, in real-time, producing high quality, timely intelligence. As a result, decision-makers can assess the severity of emerging threats and take proactive action to mitigate risk, thereby safeguarding the business and strengthening operational resilience.

Key benefits

- Higher quality insights at unprecedented speed
- Improved operational efficiency
- Reduced risk to your organisation

Centralise all your intelligence requirements

- Reduce the risk of cyberattacks
- Understand the impact of geopolitical and physical risks
- Monitor supply chain and third party risks
- Protect your assets and brand from risk
- Prioritise and patch vulnerabilities in real-time
- Automate workflows, metrics and reporting

Improve the efficiency and productivity of your intelligence team

86% Faster actionable intelligence

Unify the intelligence cycle with a single workflow

34% Improved analyst productivity

Save time, reduce duplication of effort and scale your output

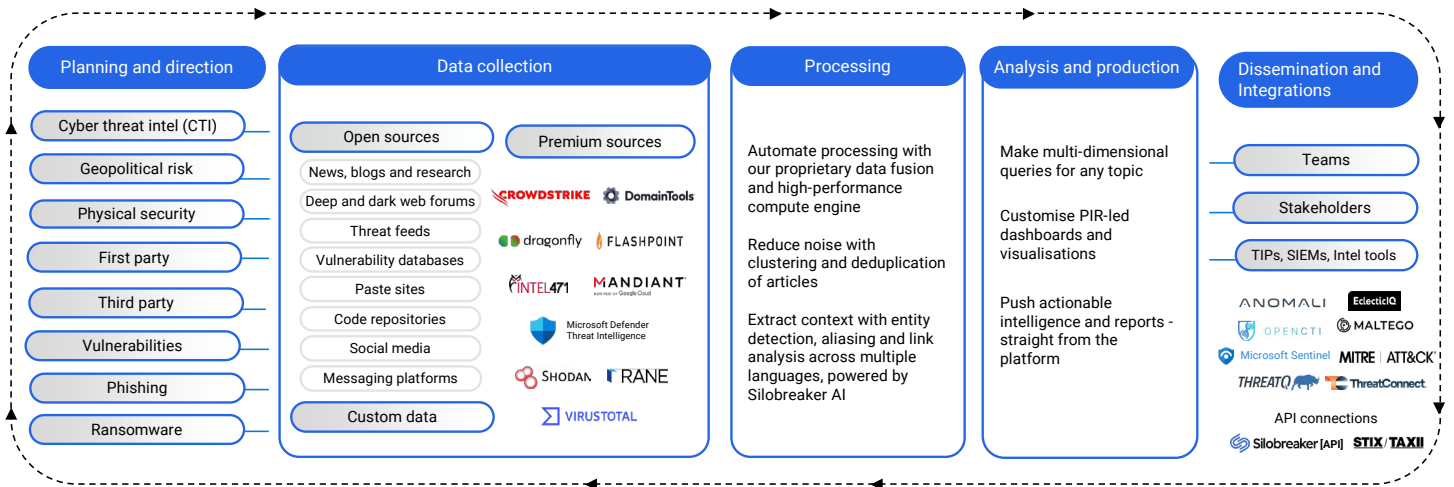

553% Return on investment

Streamline operational cost and reduce risk

How Silobreaker works

By unifying the intelligence cycle, security teams can save time, minimise duplication of effort, expand the capabilities of the team and accelerate output.

Pure SaaS deployment

Silobreaker is a modern SaaS platform built for scalability, accessibility and security. This means reduced set-up time and cost, and simplified ongoing management for security teams across the enterprise.

Data Integrations

Silobreaker supports a broad range of integrations, allowing you to consume all your primary sources of intelligence in a single space and support existing workflows by seamlessly integrating with other platforms.

Silobreaker AI

Silobreaker AI is integrated into the Silobreaker intelligence platform to summarise and extract key insights, quickly and accurately, acting as a trusted threat intelligence assistant to busy analyst teams.

Onboarding with a dedicated customer success team

Our experienced team will quickly get you up and running to achieve your short- and long-term business goals, allowing you to stay ahead of risks and maximise the value of Silobreaker from the outset.

About Silobreaker

Silobreaker is a leading security and threat intelligence technology company, that provides powerful insights on emerging risks and opportunities in near-real time. It automates the collection, aggregation and analysis of data from open and dark web sources in a single platform, allowing intelligence teams to produce and disseminate high-quality, actionable reports in line with priority intelligence requirements (PIRs). This enables global enterprises to make intelligence-led decisions to safeguard their business from cyber, physical, and geopolitical threats, mitigate risks and maximise business value.
