# Generate faster and higher quality cyber threat intelligence

Integrate Mandiant Premium Cyber Threat Intelligence with Silobreaker to streamline data collection, intelligence production, and delivery in one platform. This combination delivers higher quality insights at unprecedented speed, improving analyst efficiency and reducing risk.

Transform threat intelligence quality and speed

Mandiant finished intelligence reports, cultivated by more than 500 experts, help you get a more comprehensive view of the cyber threat landscape. Silobreaker helps you produce higher quality intelligence faster by unifying the intelligence cycle in a single SaaS platform; from the management of intelligence requirements to the automated collection and processing of structured and unstructured data; to the analysis, production and dissemination of threat intelligence.

Connecting to Mandiant is quick and easy

Connecting your Mandiant Threat Intelligence Fusion or Mandiant Threat Intelligence Security Operations subscription is quick and easy. Simply enter licence keys in the Silobreaker SaaS platform to begin collecting Mandiant threat reports as they are published.

Be the first to know about threats

Anticipate threats faster by accessing multiple data sources in one place. Automate the collection and analysis of millions of open, dark web data and finished intelligence sources to gain a comprehensive understanding of threats. Connect your Mandiant subscription with Silobreaker's curated intelligence to get more value from your existing investments, benefit from enhanced Silobreaker visualisations and reduce investigation times.
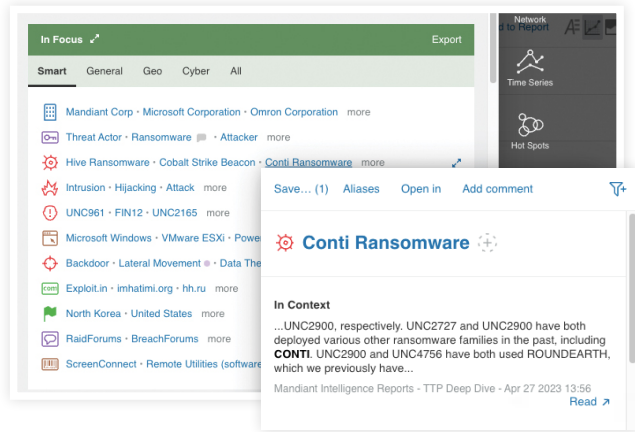

Capabilities only available in Silobreaker

Save time with one central view of intelligence
Mandiant reports are available in Silobreaker to save you time when investigating threats. Choose to view the full Mandiant collection or reports relevant to specific priority intelligence requirements (PIRs), with Mandiant report widgets accessible for any Silobreaker threat monitoring dashboard.

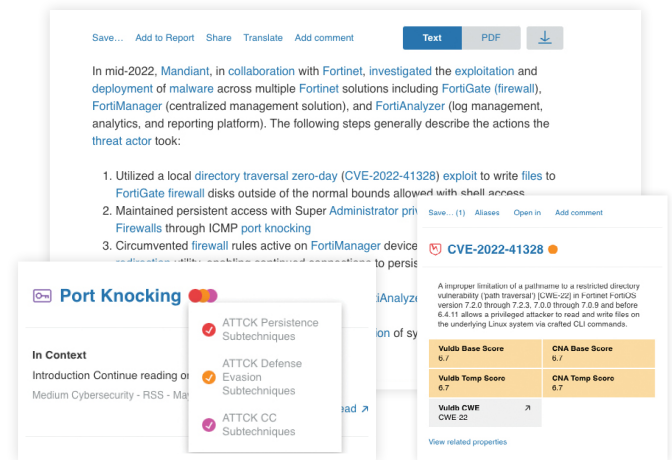

silobreaker.com

Let Silobreaker do the reading

Our unique In Focus view does the reading for you, with a quick summary of what Mandiant analysts write, including malware, threat actors, IOCs and more. This provides a fast path to the most relevant reports, the ability to link threats to assets, people or places, and greater time-to-value from Mandiant subscriptions.

Add full-context to discovery

View or download any report in the original PDF format, or switch to Silobreaker to automatically highlight entities for deeper context. Hover over any indicator to instantly reveal risk scoring from Mandiant and other providers, access term definitions and seamlessly link to content across the open, deep and dark web and other premium providers without leaving the platform. This increases analyst efficiently and adds context to reports faster.

Be the first to know about Silobreaker and Mandiant

Get a head start on threats and risks with the potential to impact productivity, operational resiliency and business continuity with Silobreaker and Mandiant. This unique combination of tools, data and intelligence will help answer the what-if questions your stakeholders pose to better inform strategic decision-making, faster.
