### Increase geopolitical intelligence quality and speed

RANE provides objective geopolitical intelligence, analysis and forecasting that reveals the underlying significance and future implications of emerging world events. Silobreaker helps you produce higher-quality intelligence faster by unifying the intelligence cycle in a single platform; from the management of intelligence requirements to the automated collection and processing of structured and unstructured data, to the analysis, production and dissemination of threat intelligence. Combine the two, and you transform the quality and speed of threat intelligence.

### A uniquely flexible platform without silos

As the lines between cyber and geopolitical risk events continue to blur, threat intelligence teams need visibility and context from more sources. By connecting your RANE subscription with Silobreaker's unique collection of data from the open web, the deep and dark web and other finished intelligence sources, you get the flexibility to quickly pivot between RANE reports, country risk scores and millions of other sources. Silobreaker also offers you the complete flexibility to customise the presentation of the aggregated data set with queries, dashboards and visualisations that can be added to alerts and reports pushed directly from the platform.

### **Connection to RANE is quick and easy**

Connecting your RANE Enterprise Geopolitical Intelligence subscription is quick and easy. The Silobreaker team will add your licence key in the Silobreaker SaaS platform to begin collecting RANE snapshots, incident reports, forecasts and qualitative risk ratings of a country's overall geopolitical, political and security risk factors as they are published.

# The power of RANE geopolitical intelligence in Silobreaker

### Verify and validate geopolitical events

RANE reports are provided in Silobreaker to save you time when investigating events and validating open-source reports. Using customisable queries, it's easy to combine unstructured data from social media, local media and Telegram chats with validated RANE intelligence and use machine learning and analytics to get precise answers and produce higher-quality intelligence.

### Anticipate change with geopolitical forecasting

Combine geopolitical and threat Intelligence from RANE for an integrated view of security and geopolitical analysis, with access to global and regional risk forecasts, event-driven research, country risk scores and outlooks on a global basis.

### Get relevance from data at scale

Using our unique In Focus view, we can read RANE content for you to and extract relevant data at scale, providing more value from your RANE investment. Providing a quick summary of any RANE reports content, In Focus identifies a range of entities including countries, organisations, incidents, violent groups and more. Enabling you to pivot or filter search results by these entities instantly, to focus your research on the most relevant content.

# Be the first to know about with Silobreaker and RANE

Get a head start on risks with the potential to impact productivity, operational resiliency and business continuity with Silobreaker and RANE. This unique combination of tools, data and intelligence will help answer the what-if questions your stakeholders pose to better inform strategic decision-making, faster.

### Quickly assess country risks

Russia, Ukraine: Kyiv Launch Attack in Apparent Start of Counteroffensive

Combine RANE risk scores with Silobreaker entity detection and customisable country watch lists to assess country risks from any source. Silobreaker will automatically detect and highlight country names in any open-source, deep and dark web or finished intelligence provider content. Simply hover over the country name to view quantitative ratings of a country's geopolitical, political and security risk factors to support intelligence and increase analyst efficiency.

### About Silobreaker

Silobreaker is a leading security and threat intelligence technology company, that provides powerful insights on emerging risks and opportunities in near-real time. It automates the collection, aggregation and analysis of data from open and dark web sources in a single platform, allowing intelligence teams to produce and disseminate high-quality, actionable reports in line with priority intelligence requirements (PIRs). This enables global enterprises to make intelligence-led decisions to safeguard their business from cyber, physical, and geopolitical threats, mitigate risks and maximise business value.
